**Cauliflower Seed**

This we have imported annually from the same growers for many years. It will produce a greater number of perfect heads than any other strain of cauliflower we ever saw. Of all the varieties that have been tried in this market OUR STRAIN OF ERFURT AND SNOWBALL HAVE GIVEN THE BEST SATISFACTION. We have our usual stock of Erfurt and Snowball and we assure you the quality is always the same and no cheap seed offered you in its place. There is no better cauliflower seed in the market, even if you pay fancy prices. Our price is \$ 1.50 per ounce.

**CAULIFLOWER.**

Ebeling's Snowball, extra small leaf, fine large head	\$1 50
Ebeling's Dwarf, Erfurt, first quality, true	1 50
Half Early Paris, large heads	50

John Cathers, Nathan Rose, Henry Wright, and other leading cauliflower growers in this section, have used our strain of Cauliflower for years and say it is without equal. A sure header, a fine yielder and a money maker.

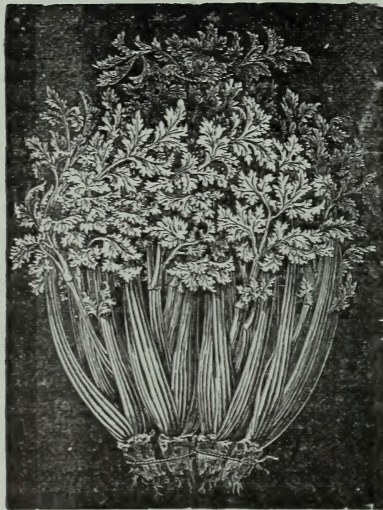

A Field of our White Plume and Paris Golden Celery.

### PARIS GOLDEN SELF-BLANCHING CELERY.

Our Golden Self-Blanching Celery is pronounced the very best and most profitable celery in cultivation. It is very early, entirely self-blanching, and can be grown without any banking up or covering whatever, even the outer ribs assuming a yellowish white color. The heart is of a beautiful golden yellow color, very large, crisp and solid. It is unequalled in striking appearance on the table or market stall, and decidedly the best keeper of all the self-blanching varieties. The largest celery growers are now planting their entire early crops in this variety, and those who purchase from us are unanimous in pronouncing our strain the best and purest obtainable. Oz., 30 c.; lb. \$1.00.

WHITE PLUME CELERY.

# MUSHROOM SPAWN.

**CAMPIGNON, FRENCH.** Culture—Mushrooms may be grown in cellars, under benches of green-houses or in sheds, wherever the temperature of 50 degrees can be kept up throughout the winter. The beds should be made from November to February, according to the time the Mushrooms are wanted, and it requires about two months for them to begin bearing. Secure fresh horse dung, free from straw and litter, and mix in it an equal bulk of loam from an old pasture with it. Keep

this under cover, taking care to turn it every day to prevent heating, until the pile is large enough to make a bed of the required size. Three or four feet wide, eight inches deep, and any length desired, are the proper proportions for a bed; but these may be varied. Prepare the mixture of loam and manure making the bed in layers and pounding down each with the back of a spade. Leave this to heat through for a few days and as soon as the heat subsides to 90 degrees, make holes in the bed about a foot apart each way, into which put pieces of the spawn two or three inches in diameter; fill up the holes with the compost, and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the

MUSHROOM BED.

bed. Spread a layer of fresh soil over the heap to the depth of two inches, and cover with three or four inches of hay, straw or litter. Examine the bed often to see that it does not get dry. Take special care, however, when water is given, that it be at a temperature of about 100 degrees. Price, 15c. per lb.

**DAY & BEARD TESTIMONIAL.**

WATERLOO, N. Y., January 7, 1902.

MR. F. H. EBELING:

*Sir*:—The past two years have been severe, in many cases, on the vitality of seeds. We, like many others, have purchased some in many places, but our great majority of you, and we can truthfully say that we would have been just as well off had we placed our entire order with you. The coming season we shall endeavor to do a larger business with you than ever. Your promptness and carefulness for our interest, for such a long term of years, are justly entitled to the best trade we can give you.

Yours very respectfully,

DAY & BEARD.

# New Things for 1902

**ONONDAGA MUSK MELON**—This new early, large, fine oblong, netted, green fleshed Melon was originated in this city, and has become a great favorite with the dealers, and much sought for as a table melon. A great yielder, very hardy, firm fleshed, attractive in appearance, a ready seller,—one of the best introductions of recent years. Price, oz. 10c; lb., \$1.00.

**Hill's Forcing Early White Spine CUCUMBER**—(NEW). Very prolific, fine quality, very early. One of the best forcing sorts known. Ounce, 10c; lb., \$1.00.

**Allen's Early Flat Dutch**—A remarkably fine strain; a sure header, the heads weighing from 10 to 12 pounds. Most valuable for forcing, or for general crop.

**Allen's Market-Gardener's Private Stock Flat Dutch**—Fine strain of the immense WINTER CABBAGE grown on Long Island for market. \$2.50 per pound.

## KOCHIA SCOPARIA, or World's Fair Wonder,

2½ Feet High, Conical in Shape; Very Handsome for Borders, &c.

This very distinct and highly ornamental annual plant is not of recent introduction, but is so meritorious and so little known that we are justified in placing it among our choice novelties for 1902. The plants grow freely from seed sown in the open ground, when the trees are coming out in leaf, and from the earliest stage of growth in the spring until they reach maturity in the fall the plants are always of the rounded or globe-like form. The plants branch freely, and the stems are clothed with slender light-green leaves. Early in the fall the ends of the shoots are thickly set with small bright-scarlet flowers,—the bushy plants resembling balls of fire. The plants are equally showy planted singly to show the round ball-like form on all sides or grown in continuous rows or hedges. Highly recommended. Per pkt., 10 cents. 3 packets for 25 cents.

## THE ROSE MAMMOTH PEPPER

Is a very large early variety of recent introduction by us, being a strong, vigorous grower, reaching a height of nearly two feet; very prolific yielder. The pods are very large, handsome, flesh thick, and mild. A great favorite with the market gardener. The earliest and best of all the large red sorts known. Price, 40c per oz.; per lb., \$2.00.

## Spaller Yellow Globe Onion.

This magnificent type of OVAL GLOBE has been secured by careful and systematic selection, and for shape, size, color and market value is unequalled. We have a limited quantity. Price, per oz., 10c; lb., \$1.25.

## JAPANESE FERN BALL.

18 to 24 Inches Across.

This little beauty from Japan is the finest addition to the Fernery yet introduced, and the most satisfactory house fern ever offered.

*Directions* :—Place ball in water for several hours and then suspend in any desired position; repeat every two days until growth has started, after which water occasionally as required, being careful that it does not become dry. The greater the growth the more water will be required to keep the ferns in a flourishing condition. To use in fern dish cut ball in halves, placing flat side down, thus getting two dishes of beautiful ferns. The Fern Ball may be allowed to dry up at any time and be set away, and started again by watering as before.

The FERN BALL will be from one to four weeks in starting, according to degree of heat and moisture. Do not expose to direct rays of sun. Price 50c each.

# TESTIMONIALS.

We list a few only of those who have bought and are using our Seeds, Tools, Implements, etc., and are pleased to refer to any of them for reference. This is better than any testimonial.

Names of a few gardeners who have dealt with this house continuously from 18 to 33 years:

Chas. B. Day, Waterloo, N. Y.,	18 years
J. N. Rose, Syracuse, “	33 “
S. B. Babcock, Fulton, “	25 “
Albert Wright, Syracuse, “	33 “
Henry Burt, Syracuse, “	30 “
Wm. Lambert, Salina, “	20 “
James McClure,	20 “
John Butler, Onondaga Valley, N. Y.	30 “
A. H. Ballard, East Onondaga, “	20 “
Geo. Craddock, Onondaga, “	33 “
Henry Wright, Syracuse, “	33 “
and many others.	

## Iron Age Riding Cultivators.

We refer to these farmers who use the “Iron Age.”

Jno. Mogg,	Euclid, “

**EBELING'S DANISH CABBAGE.**

The greatest shipper and keeper on the market. We have a very fine stock of this celebrated seed which is imported direct from the grower in Denmark for our trade. I have had this same strain for years. There is none equal to it.

Price \$3.00 per lb.

**AWNLESS BROME GRASS.**

(*Bromus Inermis*)

Will stand long droughts and produce heavy crops in dry sections where other grasses would perish. It has also proved one of the hardiest grasses. Will succeed in a wider range of temperature than any other grass. Will also grow and produce satisfactory crops on soil too poor to support Timothy and many other grasses.

Price \$2.75 per bu. of 14 lbs.

DANISH BALL HEAD CABBAGE.

## DWARF ESSEX RAPE.

The true Dwarf Essex Rape is valuable as a fattening food for pasturing sheep in autumn. It is particularly adapted as a "catch crop," for it grows best late in autumn. In the Northern States it can be sown at any time from May until the end of August, but in the Southern States it should not be sown until September or October for winter pasture. Its fattening properties are said to be twice as good as clover. Sow ten or twelve pounds per acre in drills fifteen inches apart. When sheep are feeding on Rape they should at all times have access to salt. Per lb., 8c; 100 lbs., \$5.50.

## ... SPELTZ...

The Wonderful Grain From Russia.

Russia has given us *Bromus Inermis*, the most notable addition to our list of grasses in many years. She has come to the front with a grain which is fully demonstrated to be of value for growth on poor soils and in droughty sections. It is neither wheat, rye nor barley, and yet it appears to be a combination of these. It is more like wheat than any others mentioned. For fattening cattle, poultry, horses, sheep, pigs, etc., it is claimed to be ahead of other grains, in fact, all kinds of animals seem to thrive on it. Yields 80 bushels of richer food than corn, besides giving as much as four tons of good fodder per acre. Excellent for pasture and can also be fed in the green state. As a green grass hay food it often gives 100 leafy stalks from one seed, which shows its heavy stooling properties. The heads are somewhat similar to two-rowed barley, the spikelets being separated from each other in such a manner that the crop is not easily injured by the weather. Will grow well and produce good crops on poor soil. Dry weather appears to have no effect on it. Every farmer should grow it.

The culture of Speltz is very simple. Prepare your land as you would for wheat or oats, and sow at the rate of 50 to 60 pounds to the acre. In the green state it makes an excellent pasture. Cut when the grain is past the middle stages of milk, when it will make splendid grain and lots of straw hay of excellent quality. Thresh like wheat, but not so closely. The hull and kernel can then be fed or first ground. Pkt. 10c; 1b., 20c; 25 lbs. \$1.00; 100 lbs \$2.50.

## Barley, Spring Rye, Spring Wheat and Seed Oats.

We offer choice well cleaned, true to name, varieties of SEED at reasonable prices.

**BEARDLESS BARLEY**—A fine yielder. Strong growth of straw. A barley without the objectionable beards, giving it a superior feeding value. These features combine to make it the best and most profitable Barley known. Beardless Barley was introduced by us several years ago, and has proved to be very popular. Price \$1.00.

**BUCKWHEAT**—\$1.00 per bushel.

**SPRING RYE**—We offer a fine crop of Spring Rye at \$1.25 per bushel.

**SPRING WHEAT**—We can supply SPRING WHEAT at market prices.

**WHITE SEED OATS**—We offer choice well cleaned, true to name, varieties of Seed Oats at reasonable prices.

**COW PEAS**—\$2.75 per bushel.

# True Type of Common

## MILLET.

Note the contrast between this and the Southern Golden Millet.

The True Southern Golden is the only Millet worth sowing—it yields immensely and grows quickly into a big fod-

der. We have a fine stock of the True Golden Millet, which is worth ten times as much as the "Common."

This will grow a crop six feet high on good soil.

Golden Millet, \$1.65 per bu.  
Common Millet, 1.20 "

Also offer fine stock Hungarian Millet.
